

laser safety made easy pdf

Frequently Asked Questions General interest questions Below is more information about laser pointer safety in general. There is a separate FAQ for "doubters"-- people who think concern over laser pointers is overblown. Many aviation-related questions are on the FAQ for doubters page. If you have a question not answered by either FAQ, please contact us using the link at the very bottom of this page.

Laser Pointer Safety - FAQ

A laser is a device that emits light through a process of optical amplification based on the stimulated emission of electromagnetic radiation. The term "laser" originated as an acronym for "light amplification by stimulated emission of radiation". The first laser was built in 1960 by Theodore H. Maiman at Hughes Research Laboratories, based on theoretical work by Charles Hard Townes and Arthur ...

Laser Safety Officer Training - Online | Laser Institute

A laser pointer or laser pen is a small handheld device with a power source (usually a battery) and a laser diode emitting a very narrow coherent low-powered laser beam of visible light, intended to be used to highlight something of interest by illuminating it with a small bright spot of colored light. Power is restricted in most jurisdictions not to exceed 5 mW.
