Heather, I agree completely with what you say in your article. I have to say though, that what worries me even more are the situations in which parents load their children up with so many extra curricular activities, that all the time that would normally be free time is so structured and goal oriented that in the end the child is not able to play in an unstructured environment and ultimately ...

Why We Say "NO" to Homework - Starlighting

Weebly makes it surprisingly easy to create a high-quality website, blog or online store. Over 40 million people use Weebly to bring their unique ideas to life.

Weebly Website Builder: Create a Free Website, Store or Blog

Habituation is an example of non-associative learning in which the strength or probability of a response diminishes when the stimulus is repeated. The response is typically a reflex or unconditioned response. Thus, habituation must be distinguished from extinction, which is an associative process. In operant extinction, for example, a response declines because it is no longer followed by a reward.
