The Pew Research Center's Internet & American Life Project, a nonprofit, nonpartisan research organization, provides free data and analysis on the social impact of the internet on families, communities, work and home, daily life, education, health care, and civic and political life.

### **Internet & Technology - Pew Research Center**

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

Healthy marine species like whales, sea turtles, coral, and salmon are important for maintaining balanced and thriving ocean ecosystems. We work to prevent marine species populations from decline and extinction, protect them from human activities, and monitor activities that might impact them so they are around for future generations.

Life extension is the idea of extending the human lifespan, either modestly " through improvements in medicine " or dramatically by increasing the maximum lifespan beyond its generally settled limit of 125 years. The ability to achieve such dramatic changes, however, does not currently exist. Some researchers in this area, and "life extensionists", "immortalists" or "longevists" (those who ...

ONLINE COVER To determine how North Africa's climate has evolved over the past millions of years, experts have studied dust flux records from marine sediments. These long-term records are based largely on fluxes calculated using age model-based mass accumulation rates (MARs). However, this method suffers from many potential biases, including limited resolution.
